PART E

TERMS OF REFERENCE & PROJECT BRIEF

PROPOSED SCOPE OF WORK

INDEPENDENT INVESTIGATION AND RECOMMENDATIONS ON OPTIONS FOR THE APPROPRIATE INSTITUTIONALISATION OF THE IPP OFFICE

1. OBJECTIVE

- 1.1 In terms of a Memorandum of Agreement (MoA) entered into between the Department of Energy (DoE), the National Treasury (NT) and the Development Bank of Southern Africa (DBSA) and effective from 1 May 2016 to 30 April 2019, the IPP Office was established as a specific and specialised project office hosted by the DBSA. The MoA records that the DoE and NT undertake to establish the IPP Office as a separate juristic person and that the necessary feasibility study and institutional options assessment will be initiated within 12 months from the effective date.
- 1.2 Although institutional options have been considered internally by the IPP Office and some announcements have been made by a former Minister of Energy, this matter has as yet not been concluded.
- 1.3 Recently, the Minister of Energy and Minister of Finance directed that the institutionalisation of the IPP Office should be finalised as a matter of urgency, but with recognition that it cannot be addressed in isolation and must be developed within the context of government's policy objectives and the broader alignment of institutions in the energy sector and the economy as a whole.
- 1.4 ***The objective is to present recommendations on appropriate options for the institutionalisation of the IPP Office as well as accompanying implementation documentation for the preferred option, to enable a decision on the long-term mandate, legal form, financial sustainability as well as governance and accountability of the IPP Office.***
- 1.5 The Service Provider will make recommendations to the Joint Implementation Committee (JIC), established in terms of the MoA to review certain matters related to the operation of the IPP Office.

2. BACKGROUND AND CONTEXT

- 2.1 The 1998 White Paper on the Energy Policy of South Africa commits government to implement various electricity market reforms, including encouraging private sector participation in the industry, competition and the restructuring of Eskom as well as permitting open, non-discriminatory access to the transmission system.
- 2.2 During 2010, the Government of the Republic of South Africa established an Inter-Ministerial Committee (IMC) supported by an Inter-Departmental Task Team on Energy (IDTTE) to, among others, investigate and recommend solutions to blockages preventing private sector investment in the electricity generation market. Among others, the IDTTE concluded and recommended that:
- The designated procurer of Independent Power Producers (IPPs) must be ***independent*** from the designated buyer (Eskom) to avoid any conflict of interest;
 - ***Available capacity*** within government to develop proposals for an enabling framework and procurement of IPPs was constrained; and
 - A ***highly skilled and experienced team***, including transaction advisors, is required to support the Department of Energy (DoE) to implement the IPP Programmes.
- 2.3 These recommendations gave rise to an initial MoA entered between the DoE, NT and DBSA in 2010 establishing the IPP Office. Following the expiry of the initial MoA in April 2016, a new MoA was concluded for a further 3 years to April 2019. The parties intend to extend this MoA for a further period, whilst options to institutionalise the IPP Office are investigated, agreed and implemented.
- 2.4 At the time of the establishment of the IPP Office, it was envisaged that the IPP Office would migrate to the proposed Independent System and Market Operator (ISMO) as the long-term procurer of IPPs. This would have given the IPP Office permanence in mandate and institutional form. However, an impasse was reached at the time regarding the future establishment of the ISMO, and the IPP Office has, as yet, not achieved permanency as originally envisaged.
- 2.5 The institutionalisation of the IPP Office was again raised in 2015 with the impending expiry of the 2010 MoA in April 2016. The then Minister of Energy, requested an investigation and recommendation of options, recognising the 20-year (minimum) life-cycle of the IPP projects and that the longevity of the IPP Office and the continuation of services are vulnerable unless a more permanent institutional solution is implemented.

- 2.6 A number of recommended options were put forward by the IPP Office in early 2016, following an extensive investigation. At the time, the following considerations were applied in assessing the feasibility and appropriateness of available options within the public sector, and specifically within the energy sector:
- Predictability of legal form;
 - Expediency of process;
 - Retention of an arm's length commercial model; and
 - Retention of ring-fenced funding.
- 2.7 Since 2016, several options have been considered, the latest of which was an instruction in 2017 by the Minister of Energy that the IPP Office would be incorporated as a subsidiary of the Central Energy Fund (CEF). This instruction was not pursued by the current administration.

3. CURRENT STATUS OF THE IPP OFFICE

- 3.1 Although the original designated procurer mandate vests with the DoE, the IPP Office has been providing all services required for market and project development to enable feasible IPPs and to procure new generation capacity from IPPs. Upon mandate instructions from the DoE, professional services are rendered in respect of specialised and complex procurement of high value commercial transactions as well as contract management, monitoring and evaluation (over the 20 years of the Implementation Agreement), stakeholder facilitation and advisory services. The scope of these services covers renewable and non-renewable energy sources and also extends beyond the borders of South Africa involving bilateral and multilateral energy sector commercial and advisory relations.
- 3.2 Within seven (7) years, the IPP Office completed procurement, contract execution and financial close of 91 Renewable IPP Projects that secured R198 billion direct investment. Sixty-four (64) of these projects have already been connected to the grid on time and with all construction and operational risk being borne by the private sector. The contract management, monitoring and evaluation of the shareholding, economic development, socio-economic and localisation commitments by the Sellers of the operational projects (as contained in the Implementation Agreement with the Department of Energy of terms between 20 and 30 years) is undertaken by the IPP Office while the contract management of the Power Purchase Agreement between the Sellers and the Buyer is undertaken by Eskom as the single-buyer.

- 3.3 IPP Office staff are employed by the DBSA under fixed-term contract and the procurement of external advisors and goods and services are conducted by the DBSA. The operations are fund on a cost recovery basis from bid registration and development fees paid by bidders in the IPP Programmes.
- 3.4 To date, the IPP Office established methodologies and amassed skills recognised with credibility in the energy market locally and globally. This South African grown capacity and capability can be of value to the broader economy beyond the energy sector. Increasing interest has been shown by other levels of government and public entities, as well as other Development Finance Institutions (DFI's) to use the IPP Office core capabilities for enabling and procuring private sector investment in infrastructure and extending the knowledge gained in procuring renewable energy to other countries.
- 3.5 In view of this rising interest, and the need to ensure financial sustainability of the IPP Office, the National Treasury in January 2018 instructed the DBSA to facilitate the pursuit by the IPP Office of such broader mandate opportunities on a cost recovery basis, over an 18-month pilot period, provided that the existing MoA and IPPPP mandate is not disadvantaged.

4. SCOPE OF WORK: APPROACH

- 4.1 The Service Provider will undertake an extensive independent investigation of realistic, economical and “no-regrets” options in relation to the permanent institutionalisation of the IPP Office. Options presented must take into account predictability of legal form, expediency of process; retention of an arm’s length commercial model and retention of a ring-fenced cost recovery mechanism.
- 4.2 In addition, the Service Provider must consider whether a public entity option is the only feasible option for the institutionalisation of IPP Office, and should also investigate other private or non-governmental options with reference to international best practice examples.
- 4.3 The Service Provider will be required to consult all relevant and applicable national development plans, policies and legislation (including as relevant to corporate law and governance as applicable to the public sector and companies in general) as well as available documentation prepared in consideration of institutionalisation options, since 2010. In addition, the Service Provider will be required to consult with the DoE, NT, DBSA and the IPP Office. The IPP Office will facilitate introductions and consultations as required.

- 4.4 The Service Provider will consult with the Department of Public Service Administration (DPSA) and National Treasury, on the feasibility of public sector options, in line with the Public Financial Management Act (PFMA) and National Treasury /DPSA Guidance on Establishment of Public Entities, 2002.

- b) Legal form, including public, private or non-governmental option;
- c) Financial sustainability; and
- d) Governance and accountability of the IPP Office.

Following instruction from the JIC, the Service Provider will draft and present a detailed business case in relation to the preferred option following, prescripts of applicable law and best practice. The business case shall include, but not necessarily be limited to:

- A specification of minimum performance indicators;
- An indication of Human Resource Management, work organisation, remuneration (in particular at CEO and Board member levels); and
- Recommendations on the appropriate delivery business model.

The Service Provider will present the Business Case to the JIC, within 4 (four) months after the signing of the agreement.

5.1.3 Phase 3: Preparation of Founding Documents and Implementation Plan

Upon the approval of the Business Case of the preferred option, the Service Provider will prepare all founding documents (Memorandum of Incorporation, shareholders agreement and draft legislation – if applicable), as well as an implementation plan, as may be required.

The Service Provider will present the draft Founding Documents and an Implementation Plan to the JIC, within 6 (six) months after the signing of the agreement.

7.2 The Service Provider will report directly to the JIC, and all documents and correspondence will be routed through the Secretariat to the JIC. The JIC, through the Secretariat, will facilitate introductions and consultations with key stakeholders.

7.3 The Service Provider's team leader will act as the central contact point with the JIC and coordinate, manage and quality control inputs from the team.

- 7.4 The Service Provider will submit all reports and accompanying documentation to the Secretariat for distribution to the JIC.
- 7.5 The JIC will consider proposed options prepared during Phase 1 and provide feedback and instruction to the Service Provider on the preferred option, following the necessary consultations within governance structures, where required.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
